DETAILED ACTION

1. Applicant's election without traverse of group I in the reply filed on 8/11/06 is acknowledged.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-47 of U.S. Patent No. 6,849,270. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both claiming composition comprising hydrophilic polymer attached to a dithiobenzyl moiety via a linker.

4. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-33 of U.S. Patent No. 6,342,244 B1. Although the conflicting claims are not identical, they are not patentably

distinct from each other because they are both claiming composition comprising hydrophilic polymer attached to a dithiobenzyl moiety via a linker.

5. Claims 14-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-33 of U.S. Patent No. 6,605,299 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both claiming polypeptide composition comprising hydrophilic polymer attached to a dithiobenzyl moiety via a linker and ligand is derived from a polypeptide.

6. Claims 1 and 3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,365,179 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both claiming composition comprising hydrophilic polymer attached to a dithiobenzyl moiety via linker. And an amine – containing drug attached in ortho or para, which is viewed to be identical of the therapeutic drug linked to an amine linkage as claimed in claims 2 and 8 of the patent.

7. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The references that are lined through in the PTO-1449, have not been provided by Applicant.
